

News

Flexlock 2020:

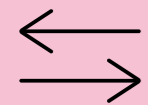

FLEXLOCK 2.0

Both Invisible and Visible have new software. News in managing between main cards and locks. The new software also includes new features, improvements and opportunities:

EXTENDED CARD SUPPORT

Ability to read even more kinds of user cards.

PROGRAMMING EXCHANGE

Function that prepares the lock to receive a new programming card and service card with unique ID number.

LED

Both Invisible and Visible are now available with LED. Standard in Visible 2.0 and for Invisible 2.0 its only available in a special product version for Mifare. A green flashing light indicates a free storage. Suitable for Mode 3, 4 and 5.

"MODE ANY TIMER"

New timer mode. Possibility to set optional time limit in public mode. **Choose hours from 1 hour up to 166 hours.**

FLEXLOCK CONNECT

In 2020, Connect will be launched. It is our new family with various products that enables communication with Flexlock. Smart solutions that simplify centralized management, and administration of your locks. The locks does not require an external power supply. Only in Mifare.

CONNECT SMART

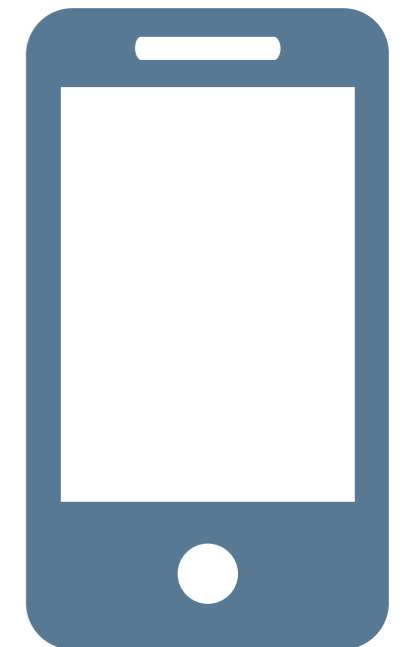

Connection between lock and smartphone. Smart centralized administration via smartphone and cloud. Only compatible with Flexlock Invisible.

CONNECT WIRELESS

Wireless connection to the locks. Card-based programming. Centralized administration via cloud. Only compatible with Flexlock Invisible.

CONNECT PLUGIN

Connection to the locks with cable. Card-based programming. Manual handling with plug-in unit and cloud. Works for both Flexlock Invisible and Visible.
